

A photograph of three healthcare professionals in white lab coats. A man in the center, wearing glasses and a stethoscope, is holding a clipboard and talking to two women. They are standing in a bright room with white blinds in the background. A large teal triangle is overlaid on the left side of the image.

## SoHM Hospital Medicine Group Profile

### Things You Need to Know About Section 2

This section provides general group-level demographic information about the *State of Hospital Medicine* Survey participants. Refer to the appendices for more information about the terms used in the Report and for a copy of the Survey instrument.

### Notes About the Data Tables in This Section

This section contains information about the demographic breakdown of the Survey participants. The tables contain both overall results as well as a breakdown by types of patients seen (adult and pediatric).

**Note (state representation):** This table shows the breakdown of participation across all the states. The 2023 SoHM Survey participation had a similar regional representation as in the 2020 and 2018 SoHM Survey. However, this does not necessarily reflect the relative proportion of Hospital Medicine Groups (HMGs) in the states. As such, some states may be over- or under-represented in this data.

**Note (group size):** The average number of FTE physician hospitalists in groups across all the regions increased significantly from 2020 to 2023 (East: 49.1% increase; South: 18.6% increase; Midwest: 37.9% increase; West: 85.6% increase)

### Ownership/Employment Model

	All Groups (Overall %)	Adult HMGs (%)	Pediatric HMGs (%)
Hospital, health system, or integrated delivery system	231 (62.3%)	200 (62.9%)	31 (58.5%)
Private local/regional hospitalist-only medical group	12 (3.2%)	12 (3.8%)	0 (0.0%)
Multistate hospitalist management company	48 (12.9%)	48 (15.1%)	0 (0.0%)
Private multispecialty or primary care medical group	11 (3.0%)	10 (3.1%)	1 (1.9%)
University, medical school, or faculty practice plan	62 (16.7%)	43 (13.5%)	19 (35.8%)
Other	7 (1.9%)	5 (1.6%)	2 (3.8%)
<b>Total Groups</b>	<b>371</b>	<b>318</b>	<b>53</b>

**Note:** This table represents the distribution of Survey respondents and does not necessarily reflect the distribution of employment models in the broader field. Certain types of HMGs may be more or less likely to participate in the Survey than others. There are differences in the employment model breakdown from 2020 to 2023.

### Types of Patients Seen

	Groups	Percentage
Adult HMGs	318	85.70%
Pediatric HMGs	53	14.30%
<b>Total</b>	<b>371</b>	<b>100%</b>

**Note:** The 2023 Survey eliminated the grouping for both “adults and pediatric” and respondents were asked to choose their primary service model or report individually for both.
